Join the Crowd at the Irma Fair Tues., Wed., August 14-15th

EVERYTHING POINTS TO A REAL FAIR

The Irma Fair and exhibition Tuesday and Wednesday, Aug. 14-15, has become the talk of the town and district and from now on until the day of the fair it will be feverish activity on the part of all those connected therewith.

Entries are already pouring in to the Secretary's office and indications are that all classes will be well represented when the fair opens August 14th.

BASEBALL

Included in a good list of sports is a baseball tournament of three games, for prizes as follows: 1st \$50.00; 2nd \$25.00.

SPORTS AND RACES

Men's Half Mile race, 1st \$7.00; 2nd \$3.00.
Bicycle race for boys 16 and under, 1st \$5.00; 2nd \$2.100 Yard dash, 1st \$5.00.
Many side attractions.

MIDWAY AND MUSICAL RIDES

The secretary has secured a good Amusement Co., to come here with a full equipment of musical rides, midway attractions, concessions, real merry-go-round and ferris wheel, and variety shows.

EXHIBITS GALORE

Everything points to a real fair. The horse classes are sure to be well filled this year and cattle men are also fitting their stock for the event. Products of farm and field should show up good this year, and there is no doubt about the excellent exhibits that will be shown in the ladies classes, domestic products, vegetables, grains and grauges, etc.

MACHINERY EXHIBITS

Local machine men and automobile dealers are preparing to have a regular machinery row on the fair grounds, and this in itself should prove a drawing card in this day and age of motors and tractors, combines, and what have you.

DANCE AND PICTURE SHOW

There will be two motion picture shows in the new theatre, afternoon and evening, after the final show a grand ball will be held with a first class orchestra in attendance. Remember Wednesday, August 15th is the big day and you shouldn't miss it.
Reap the benefit of a holiday before harvest time by attending the Irma August 14-15.

TOO MUCH STOCK

Monday afternoon over half of the floor in the south side of Jack Fletcher's hardware store, dropped, letting a lot of his stock of hardware drop in the basement. Fortunately on account of the dampness of the cellar, Mr. Fletcher had practically no stock stored in the basement. As soon as the accident happened several volunteers turned in and helped move the stock to the garage and other parts of the store. Carpenters are now putting in a new floor and business is going on as usual.

AUGUST "ROD AND GUN AND CANADIAN SILVER FOX NEWS"

The August issue of "Rod and Gun and Canadian Silver Fox News," which is just published, contains a highly interesting collection of yarns and stories of outdoor Canada and hunting and fishing. In the list there is a very good story of a more unusual humorous type in "So This is Moose Hunting" by John Richmond. The contents also include several articles of a conservation note, as well as useful information for hunters, fishermen and campers.

The Guns and Ammunition department, edited by C. S. Landis, includes much useful material for the gun crank, while anglers, outdoorsmen, campers and dogmen are well catered to in the special departments edited by well known authorities. The Canadian Silver Fox News section contains a very complete report of the annual meeting of the Canadian National Silver Fox Breeders' Association. "Rod and Gun and Canadian Silver Fox News" is published monthly by W. J. Taylor Limited, Woodstock, Ontario.

Viking

All local citizens who have had the pleasure of a motor trip to other parts of Alberta and western U. S. are loud in their praises for the auto camps which in most cases were a part of the various communities visited. The Alberta government realizing the growing necessity of these camps have issued regulations governing same. It is very likely that next year Viking will fall in line and establish an auto camp as the increasing tourist traffic this year has shown us that there is a demand for one. With natural gas facilities and good groves of trees in the near vicinity there should not be much difficulty in finding a suitable location.

Mr. V. Dilworth returned from a visit to Calgary on Monday and has made arrangements to move his family there in a few days. Mr. Dilworth has accepted a good position with the General Supplies Co., Limited, of Calgary, as travelling agent, with headquarters in the city. He has also brought a home in Calgary and will leave to take up his new duties as soon as the household effects are packed. Mr. Dilworth has been buyer at the Wheat Pool elevator here for the past year and managed the business right well. The Dilworth family made a host of friends during their comparatively short stay here, who will regret their departure but at the same time wish them well in their new home.

The Bruce stampede on July 26th proved a drawing card for hundreds who travelled from far and near to attend the annual event staged by the Bruce Stampede Association. The best bronze rider was P. Cooper, of Halkirk; 2nd V. Dean, 3rd P. Donkin, Best bare back rider, 1st P. Cooper, 2nd M. Dean, calf roping, 1st W. Matier.

The crowd was larger than ever, testifying to the popularity the Bruce stampede enjoys with the public. The Vagabond Elks band furnished music, and a big dance in the hall was a climax to the festivities.

Mr. and Mrs. Clyde Hoskins & family and Miss Mary Hoskins have returned from a trip to Banff and Calgary. We understand they started out to motor to Jasper Park but had to turn back on account of the bad condition of the roads.

CLOSED SEASON WILL CONTINUE ON PARTRIDGE

Continuation for 1928 of the closed season on grouse, prairie chicken and partridge is announced in the 1928 game regulations, just issued by the provincial game guardian.

The open season on Hungarian partridge is also reduced from three to two months. It opens this year on October 1st, (two weeks later than last year), and closes November 30th, (two weeks earlier than last year). The bag limit is the same—15 per day; 75 per season.

Duck and Geese

This year, the Clearwater and Athabasca rivers has been made a dividing line for the open season on ducks and geese. North of this line, the season opens September 1st, and closes December 31st, south of the line, the season opens two weeks later, on September 15, and closes December 14th.

The bag limit is the same as last year—30 ducks per day; 200 per season; 15 geese per day.

Big game hunting opens as before, September 1, one (male) mountain sheep, and one mountain goat, being the bag limit for the season, which ends October 31st.

Deer, moose and caribou (one male deer or moose, and one caribou, bag limit), may be hunted from November 1 to December 14.

Bear Season Opening

The open season on bear is limited to three male animals only, the open season being from September 1, to June 15. Females with cubs, and cubs, may not be shot.

The open seasons on fox, mink, fisher marten, otter and muskrat remain the same as last year—fox, November 1st to February 28th; mink, March 1st to May 15th; otter, November 1st to February 28th; muskrat, March 1st to May 15th. South of the north Saskatchewan river and township 91, March 1st to April 30th; south of the north Saskatchewan river, closed all year.

ADENOIDS

During the summer months, the symptoms caused by adenoids are not as noticeable as in winter. They are referred to now because this is an opportunity for having them attended to.

Adenoids are tumor-like growths that develop in the passage between the nose and throat. Very young children may have adenoids. The majority of cases occur in children from eighteen months to six years of age.

The presence of adenoids usually causes what is apparently a chronic cold in the head, with a great deal of discharge from the nose. These symptoms, with snuffles, occur during the winter season. Cough is frequently associated with the condition. If the growths are large, the child will be a mouth-breather—breathing through the mouth day or night, because the natural breathing space through the nose is blocked. This gives rise to snoring.

In advanced cases, the child has a characteristic appearance of the face. The open mouth gives a stupid expression, the nostrils are small and pinched, the upper lip is thickened. The voice may have a nasal twang. The hearing may be impaired. Bed-wetting may be part of the symptoms. Complete removal is the only treatment for adenoids of any severity.

Parents who have been advised by their physician to have an adenoid condition corrected in a child should do so. Parents of children who show evidence of adenoids, as described, should have the children examined to find out the condition. The treatment of such condition is advised because it interferes with the normal development of the child, lowers his level of physical fitness and, if severe, results in a permanent deformity of the mouth and face.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered by letter. Questions as to diagnosis and treatment will not be answered.

The victories of Percy Williams, the fleet footed Vancouver high school youth at the Olympic games should be a shining example to the youth of Canada that they can hold their own with the best athletes of the world. After next Thursday, Mr. Cork, the Jeweller and optician intends taking a vacation and will not return till September 13th. He will be in Irma as usual each Thursday after this date.

NEWS ITEMS FROM JARROW

Mrs. Amos Groner has had as her guests, two sisters, Mrs. Tucker and Mrs. Benedict, and her brother Mr. William Ayers. The sisters she has not seen for thirteen and fifteen years. Mrs. Arrie Moore and her mother Mrs. Demore are visiting at the home of Mrs. R. O. Moore.

Mrs. O. R. Marbury has just returned from Melville, Sask., where she was visiting relatives for a couple of weeks.

Mrs. Earl Moore is visiting friends in the U. S. A. for a month. Everyone is out picking berries these days. Watch out for the deer north of town while you are out.

Word was received last week that those pupils in grade nine who had successfully passed were: Aubyn Marbury, Joan Matthews, Robt. Routledge, Walter Bamsey.

Mr. and Mrs. Bruce McDougall are away on their holidays.

Mrs. W. H. Barton has just returned from spending her holidays in Edmonton and reports a very pleasant time.

Miss Daisy Kennedy has been secured as the teacher of Jarrows Junior school room and Miss M. Alford of Medicine Hat for the senior rooms.

SEVENTH FORTNIGHTLY

CROP REPORT

Wheat cutting will be fairly general in all sections of the province by August 20th, according to telegraphic reports received on Friday by the Department of Agriculture for the seventh fortnightly crop report of the season. Wheat is filling well under the influence of intermittent showers and warm weather since the last report and early sown fields are turning color rapidly. Harvesting of fall wheat has started in some southern districts and a very satisfactory yield is reported, although this was affected to some extent by the unusual drought during the month of May.

A good deal of the fall rye crop is in stock, and a good average yield is expected when this is threshed. Heavy stands of oats and barley are reported and harvesting of these grains will be general during the last week of August.

Limited areas through the central and southern parts of the province have been visited by damaging hail storms during the past ten days but the injury to crops from this source is considerably less than at the same date last year. The 1928 crop has been particularly free from the attacks of insect and disease pests.

Cutting of early wheat has commenced in some districts in the Peace River and later crops are receiving the benefit of good rains which are expected to bring the yield of both wheat and coarse grains fully up to the average.

The first cutting of alfalfa is in the stack in Southern Alberta and the second crop is making rapid growth. Sugar beets are recovering well from the setback occasioned by the excessive rainfall of June and are promising a very satisfactory yield. Pasture, are having an exceptionally good season, as a result of which livestock is in very good condition in all sections of the province.

DAY AT THE DOMINION EXPERIMENTAL STATION FRIDAY, AUG. 17.

Mr. L. H. Newman, Dominion Cereal and Mr. Peter Stewart, Secretary, Canadian Seed Growers' Association, both of Ottawa, will be at the Dominion Experimental Station, Lacombe, on this date to discuss problems in connection with the production of registered seed grain. The Experimental Station has some 110 different plots of grain grown from seed submitted by Alberta Seed Growers to the Canadian Seed Growers' Association for verification tests. These will be showing to advantage on this date and will provide very interesting comparisons with respect to purity of variety and type. In addition to this, interesting variety testing, plant breeding and Elite Stock Seed Production experiments will be available for observation and discussion. Come and bring any of your friends who are interested in the production of registered seed grain.

F. H. Reed, Superintendent.

NEWS ITEMS FROM KINSELLA

Mr. D. Corbett spent a few days at Edmonton last week.
Mrs. Miller spent a few days at Wainwright last week.
Mr. and Mrs. Fleming and children of Medicine Hat visited Mrs. Miller last week.
Mrs. McKie and daughter Chrissie are visiting in Edmonton.
Miss Elliott of Ontario is visiting her father Mr. Elliott.
Mrs. Thorne and two children of Winnipeg are spending a short time with Mr. Thorne at the Gravel pit.

SPECIALS ADDED TO IRMA FAIR

The Irma Branch of the Women's Institute will give a special prize for the best picture of a farm, to be drawn by a school child in grades 6-7 or 8, to be on a drawing pad 6x12 with one inch margin and not colored and not to be copied from any other drawing or picture. The first prize will be \$3.00 and second \$2.00.

A special prize of \$5.00 will be given at Irma Fair by C. Cole for the best pair of chickens hatched from eggs purchased from him. Must be at least three months old at time of exhibition.

TEST VALUE OF CHEMICAL WEED DESTROYERS

In connection with the campaign which has been undertaken with increased energy this season for the eradication and control of noxious weeds, every possible means of weed destruction is being tried out. In addition to the methods which have proved so effective in previous years, a number of new agencies are being utilized and it is hoped that many of these will prove to be of value.

With the object of encouraging the use of these agencies which are effective and to determine which ones have real merit, the Field Crops Branch of the Department of Agriculture has undertaken a series of tests at a number of points in the province where various chemical weed destroyers and other methods of eradication are being given a thorough try out. In the meantime it has come to the attention of the Department that firms promoting the sale of some of these chemicals are advertising that these materials are being used by the Government. This is not correct. It may be pointed out, however, that until tests of a more conclusive nature have been made, the Department of Agriculture is not in a position to bar out the claims made for any of these treatments. It is hoped however, that some of them will prove to be effective and when this is clearly demonstrated the Field Crops Branch will make a statement to that effect.

PLAN SMALL PARKS THROUGH ALBERTA

In the course of a few years Alberta will have a series of 20 or 30 provincial parks of ten or fifteen acres scattered throughout the province as playgrounds for the people and dedicated to their social needs and enjoyment. This phase of the town and rural planning objective of the government was made clear by Premier J. E. Brownlee when he addressed the combined U.F.A. locals at their picnic at Battery Point, Henderson Park, on Tuesday afternoon.

It is part of the program that has been outlined for the town and rural planning department of the government and a director of which will be appointed within the next month or two.

FARMERS' WEEK AT EXPERIMENTAL STATION, LACOMBE

On Monday, Tuesday, Wednesday and Thursday, August 20 to 23, a 4 day course of lectures and practical demonstrations on Live Stock, Field Crops, Poultry Horticulture and Beekeeping will be given at the Dominion Experimental Station, Lacombe. Experts, prominent in each line of work from the University at Edmonton, the Provincial Department of Agriculture, Canadian Pacific Railway Department of Natural Resources and the Dominion Live Stock Branch will assist the staff of the Experimental Station. Evening addresses will be given by prominent speakers.

CHURCH NOTICES AND ACTIVITIES

SUNDAY SCHOOL NEWS

Does some one say, "My! I wish there was a library in town where one could get a book to read." Come to Sunday School at 11 a.m. Sunday morning and you can get a book to read by signing your name when you receive and return it, without money and without price.

Why are there so many different ideas as to what one should do or not do as a Christian? To illustrate: Madge Cook's hard working parents think all games are sinful. James Smith's mother thinks that certain games are wrong and others all right. Isobel Dobson's folks say that any game is all right so long as one plays in good company. Can you account for such differences of opinion? These and other problems will be discussed by different classes Sunday morning. Everybody invited.

NOTICE

IN THE ESTATE OF CHARLES RAY REED, late of the Village of Irma, in the Province of Alberta, Farmer.

NOTICE is hereby given that all persons having claims upon the estate of the above named Charles Ray Reed who died on or about the 29th day of May, A. D. 1928 are required to file with, Olive Geraldine Reed, Executrix of the said estate at Irma, Alberta, by Friday the 13th day of September A. D. 1928 a full statement duly verified of their claims and that after that date the Executrix will distribute the assets of the deceased's estate among those entitled thereto having regard only to claims of which notice has been so filed and brought to the knowledge of the Executrix of the said estate.

Dated at Viking, Alberta, this 26th day of July, A.D. 1928.

C. G. Purvis, Solicitor for Executrix.

Industrial Development In Canada

Possibilities in the future development of industries in Canada, and the utilization of the natural resources of the Dominion as the essential raw materials in such development, and the manner in which all the people can assist in such development and expansion of manufacturing in Canada formed the subject matter of a recent address by Hon. Charles Stewart, Minister of the Interior, before the Young Men's Section of the Winnipeg Board of Trade, which is worthy of the most serious consideration, and especially so because it is so simple, so thoroughly sound, and so applicable to all parts of the country.

Mr. Stewart did not vision a future Canada with a limited number of great manufacturing centres, possessing many huge plants, located in certain sections of the country, with gigantic outputs supplying the home market and providing a large export trade, and largely controlled by a few corporations or wealthy individuals. Undoubtedly Canada has already created a number of such large industries and will continue to do so as the population and wealth of the Dominion grows. The idea submitted by Mr. Stewart for serious consideration was along quite another line.

Mr. Stewart sees in Canada, east, central and west, in the north as well as in the southern portion, a country of vast resources and of varied character. Many of these natural resources of a similar nature are to be found in widely separate sections, and he feels their development should be general and that they should be tapped at many points rather than attempting to supply the requirements of the people from one or two places located far away from the mass of consumers.

In other words, Mr. Stewart advocates study of a plan which contemplates the establishment of industries in numerous communities to utilize those natural resources which may be found adjacent to such communities and thus supply the local and regional demand instead of transporting such goods long distances from other countries or far distant parts of Canada. Such a plan, easily carried out, would not only result in huge savings in the aggregate to the public, but would lead to the development for use of resources now lying dormant, would build up numerous small industrial towns, provide more employment, and materially assist in solving the problem of unemployment which frequently becomes acute in certain parts of the Dominion by reason of the seasonal nature of the occupations of a vast majority of the people.

In presaging his thought on this subject, Mr. Stewart expressed the opinion that bodies like boards of trade should take up the close study of the raw materials of their districts, and of the markets for manufactured commodities. Such local studies would, he believed, reveal many possibilities for starting new industries at appropriate points. Statistics on the importation and movements of manufactured commodities had led to the conclusion, he said, that many of the articles could be made at home, and this, also applied to goods transported from other parts of Canada in many cases unnecessarily, because the same thing could be made on the ground. The possibilities of manufacturing locally had been brought home to many towns and cities, largely through the initiative of enterprising public bodies like the board of trade, assisted by the facts on file in the department at Ottawa. Raw material, as far as possible, should, he contended, be prevented from leaving Canada so that the country's resources to the greatest extent might be utilized for those living therein.

In all such endeavors, boards of trade everywhere, Mr. Stewart stated, would have the assistance of the government in a whole-hearted way. His department was always willing to co-operate with any public body in placing at the disposal of interested persons locations of the country's natural resources. Experts of the department would be made available, and would be sent to any localities where their services would be of assistance.

The policy suggested by Mr. Stewart should make a particularly strong appeal to boards of trade throughout the three prairie provinces, which, up to the present time, have been so largely dependent upon the other provinces and foreign markets for the manufactured goods which our people consume in such large quantities, and for which we have been obliged to pay high prices because of the enormous distances these goods have had to be transported from the point of manufacture.

That Mr. Stewart's idea is sound, is borne out by the experience of many towns and many industries. Some of the most flourishing industrial towns and cities secured their start through the establishment of a comparatively small local plant utilizing some raw material found in the locality, and history is filled with instances where these small local industries have, under careful and progressive management, grown into what are now classified as among the great industries of the country. Hundreds of such instances, both in Canada and the United States, could be given.

In the past, western boards of trade, and western people generally, have possibly made the mistake of bending their energies to secure the location of branch factories, warehouses, or distributing agencies of outside concerns. A branch factory of some big and well known concern loomed larger on their horizons than a small locally-owned and operated factory. In the long run the latter offers greater things for the community than does the former. All its interests are at home and it is there its growth and development will count for most.

All Western Canada would gain through widespread action on Stewart's suggestion. Economically and politically the country will be stronger and more prosperous if, instead of possessing a few very large industrial cities, these prairie provinces are dotted over with numerous, albeit medium sized, industries utilizing local supplies of raw materials and creating thriving communities about them.

Special Cameras For South Polar Flight

One Will Automatically Develop and Deliver Strips Of Film

Photography is to play an important part in the South Polar flight to be made by Commander Byrd. Two

special automatic cameras are being constructed, one to take pictures of the sun as an aid to navigation, and the other to record each mile of the flight.

While the flight is in progress the first camera will automatically develop and deliver strips of film. The second camera will be attached to the bottom of the plane and will follow the path to the Pole, recording from a height of 5,000 feet a strip of the Polar plateau eight miles in width.

Will Not Loan Pictures

The request of the Canadian National Exhibition that the four state portraits of King Edward VII, Queen Alexandra, King George V, and Queen Mary may be loaned that the visitors to the C.N.E. might see them has been refused by the government on the grounds that these are gifts from His Majesty.

Life is made up of getting and giving and forgetting and forgiving.

No Restrictions On British Immigrants

Propaganda Calculated To Impair Prestige Of Canada Is Circulated

"Apart from the common sense requirements concerning health and character, there are no restrictions on Britishers coming to Canada to live," Hon. Peter Heman, minister of labor, said, when asked about complaints published in British papers that Canada was too strict in its provisions for admitting people from Great Britain into this country.

For some time, the minister added, both here and in England, Canadian immigration regulations have been subjected to severe criticism insofar as the admission of Britishers is concerned. It is claimed in England that people are not being encouraged to emigrate to Canada while in this country it is said that immigrants are being induced to come when no employment is available for them.

"It is difficult to see what the propagandists have in mind, had the result can only be to impair the prestige of Canada in the eyes of residents of the mother country."

COMPLETELY RUN DOWN

Symptoms That the Blood Is Thin Should Not Be Neglected

Weak, run-down, lacking strength, energy and initiative, nervous, sleepless, poor appetite, digestion disturbed—these are the symptoms named by a great majority of people who have been benefited by the use of Dr. Williams' Pink Pills. These tonic pills correct the condition described and if you have any of these symptoms you should give these pills a trial. Their great value in cases of this kind is shown by the statement of Mrs. James A. Tibbets, Ithaca, N.S., who says: "I was completely run down in health. My blood was thin and my nerves so weak that I did not sleep well at night. My appetite was poor and the least exertion left me weak and trembling. When I went out I would have to be down as soon as I got in the house. A friend advised me to try Dr. Williams' Pink Pills. I soon found they were helping me and by the time I had taken the sixth box I felt like a new woman, and have enjoyed good health ever since. For this reason I can highly recommend the pills to anyone run-down or troubled with their nerves."

Not only do Dr. Williams' Pink Pills help the nerves. Their main function is to enrich and increase the blood, as with the blood in the whole body, new life is given to the entire system. Better sleep, steady nerves, improved appetite, increased vigor—all these can be yours by taking Dr. Williams' Pink Pills. Begin them today. Sold by all medicine dealers, or by mail post paid, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Safety In The Air

Number Of Fatalities In Aviation Accidents Is Decreasing

In contrast to the rising death rate from automobile accidents is the decreasing number of fatalities in aviation accidents. In 1920 there were 185 deaths in airplane and balloon accidents; in 1926, when the number of those flying had increased enormously, there were 170 deaths. The ratio of deaths to miles flown was in the first year one to 97,567; in 1926, it was one to 1,387,964.

Miller's Worm Powders are a pleasant medicine for worm-infested children, and they will take it without objection. When directions are followed it will not injure the most delicate child, as there is nothing of an injurious nature in its composition. They will speedily rid a child of worms and restore the health of the little sufferers whose vitality has been impaired by the attacks of these internal pests.

The output of creamery butter for Saskatchewan in June, was over 1,276,797 pounds, an increase of 119 per cent. over the previous month.

COULD NOT WORK FOR MONTHS

Restored to Health by Lydia E. Pinkham's Vegetable Compound

Port Elgin, N. B.—"For three months, I was nervous and weak with tired feelings and could not do my work. A friend advised me to take Lydia E. Pinkham's Vegetable Compound and I got good results from it and recommend it to others." LILA EATON, Port Elgin, N. B.

This dependable medicine is sold by druggists everywhere.

"Swat the fly" with GILLETT'S LYE

A teaspoonful of Gillett's Lye sprinkled in the Garbage Can prevents flies breeding

Use Gillett's Lye for all Cleaning and Disinfecting

Costs little but always effective

Recipes For This Week

(By Betty Barclay)

ORANGE SMOOTHIE

2 cups flour.
1 teaspoon salt.
4 teaspoons baking powder.
4 tablespoons sugar.
4 tablespoons shortening.
1/2 to 3/4 cup of milk.

Sift the dry materials until well blended. Rub in the shortening using a fork. Cut in just enough milk to make a soft dough. Put in, creased, cake pan, press with back of hand to shape of pan, and bake twelve to fifteen minutes in hot oven.

Filling

6 oranges.
1/2 cup sugar.

Wash oranges, remove the skin, cutting off all white membrane. Cut the orange in half and cut in cubes of uniform size. Sprinkle with sugar, then spread between the prepared crusts. Serve with a sauce made with the juice of two oranges and three fourths cup sugar.

MEDIUM CREAM SAUCE FOR VEGETABLES

2 tablespoons butter.
2 tablespoons flour.
1 cup milk.
1 teaspoon salt.
Few grains pepper.

Put butter in saucepan, stir until melted; add flour mixed with seasoning. Stir until thoroughly blended. Pour on milk, one-third at a time, while stirring. Bring to the boiling point. A double boiler is preferable in order to prevent burning. Use 1 cup cream sauce to 1 cup cooked vegetable.

Asthma Can Be Cured. Its sufferer is as helpless as it is terrible to endure. After its many years of relief of the most stubborn cases no sufferer can doubt the perfect effectiveness of Dr. J. D. Kellogg's Asthma Remedy. Comfort of body and peace of mind return with its use and nights of sound sleep come back for good. Ask your druggist; he can supply you.

Pool To Pay Dividends

Saskatchewan Wheat Pool Members To Benefit Through Dividends On Pool Elevator System

Members of the Saskatchewan Wheat Pool will receive approximately \$800,000 in September as a result of the six per cent. dividend that the Pool is paying on the money invested in the Pool elevator system. The principal for this system has been obtained from members by deducting two cents per bushel from all cheques paid to them.

The Pool members will also receive a dividend of 5 per cent. on the reserve fund. C. W. King, manager of the Pool here, was unable to say what amount this would involve.

It was stated recently by A. J. McPhail, president of the Wheat Pool, that as soon as the Pool controlled shipping facilities at every point the two cents per bushel deduction would be returned to members and that the ownership of the system would be kept fresh, by the "revolving door system" which means that two cents per bushel would still be deducted from annual payments by members, but a corresponding amount would be returned each year. This members of the Pool were saving an amount annually, which in many cases was as high as \$200.

By using X-rays, two generations of tobacco plants have been grown in one year.

Let Minard's Liniment Relieve Pain.

The average man often uses better judgment in selecting a cigar than in choosing a wife.

Invented Electric Net To Snare Submarines

Eminent Canadian Also Aided Admiralty With Charts Of British Isles

Albert Close, eminent Canadian cartographer, whose charts of the British Isles proved invaluable to British fishermen and to the admiralty during the great war, has returned for a visit to his old home, at Nanaimo, Ont. A great achievement of his during the war was the inventing of an electric net to snare submarines. He has recently prepared a detailed plan of the battle of Jutland, for which he was congratulated by Lord Jellicoe. Before returning to England, Mr. Close will interview the department of marine and fisheries and fishing shippers of Newfoundland, Nova Scotia, and the Atlantic coast to obtain information of assistance in preparing new charts of Atlantic coast waters.

Hoover In English Eyes

Hope Is Expressed That He May Be The Next President Of U.S.

It is the hope of those who are beyond the narrow confines of Pan-Americanism, that Hoover may be the next President. Personally, I feel that it would be a wonderful thing for his country, for ours, and for the world at large, if he were to be the presidential chair.

He seems to me to have grown to have wisdom and broadness. I believe now, as I did ten years ago when I was working with him, that he is one of America's greatest men.—Fannie S. Swan in the British Weekly.

It Testifies For Itself. Dr. Thomas' Electric Oil needs no testimonials of its powers other than itself. Whoever tries it for coughs or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, well know that the medicine proves itself and needs no guarantee. This oil shows why this Oil is in general use.

Acted As Wireless Apparatus

Shovel Hanging In Swedish Fire Station Reproduced Radio Programme

A few days ago a coal shovel hanging on the wall of the Fire Brigade station at Kalmar, Sweden, suddenly assumed the role of a local entertainer, and began to speak, sing and play!

The firemen were puzzled, and after a closer investigation it appeared that the shovel's performance synchronized with the sending of the local wireless broadcasting station.

In some peculiar manner the shovel acted as an ordinary wireless apparatus. It was found that it was suspended on the wall in such a position that it touched the power line of the Kalmar wireless station, and that it reproduced clearly and distinctly everything sent out from that station. Wireless experts, however, have been unable so far to give a satisfactory explanation of the occurrence.

"What a lovely fur coat—what did it cost?"
"One single kiss."
"That you gave your husband?"
"No, that he gave the maid."

Minard's Liniment—a reliable first aid.

The Province of Manitoba last year produced 7,388,000 pounds of honey. Seven years ago the annual production was less than 1,000,000 pounds.

In trying to win a girl's heart a young man often loses his head.

MOST people know this absolute antidote for pain, but are you careful to say Bayer when you buy it? And do you always give a glance to see Bayer on the box—and the word *Aspirin* printed in red? It isn't the genuine Aspirin without it! A drugstore always has Bayer, with the proven directions tucked in every box:

Anything But Peaceful

Doves Are Very Quarrelsome, Says Professor Of Zoology

The dove, for centuries the olive branch carrier and emblem of peace, is found to lead a very quarrelsome family life. There may be some billing and cooing in public, but in privacy the dove mates quarrel.

Dr. W. D. Funkhouser, professor of zoology, at the University of Kentucky, makes the true facts known. It is his opinion that the crow and bluejay are the most intelligent birds and that the yellow-billed cuckoo and the catbird are the "best all-round friends of man."—Capper's Weekly.

Complete In Itself. Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

The apple crop of Canada for 1926 is estimated at 3,157,960 barrels, an increase over 1927 of about \$50,000 barrels.

There is more fiction in fact than there is fact in fiction.

HERCULES

PERMANENT BUILDING PAPER

CUT IT—it doesn't tear easily

There's no denying that the most careful carpenter doesn't handle his tools with the dainty movements of a dentist.

Consequently he will appreciate a building paper which allows him to throw careful handling to the winds and work rapidly without fear of tearing. Hercules Permanent Building Paper is tough. Tearing or cracking in use is unheard of. Carpenters prefer it because it is easy to use.

Hercules—in three grades, x light, xx medium, and xxx heavy, is wind proof and damp proof. Send now for samples and prices.

Shortage of Russian Wheat Has Tendency To Steady Markets, But Lower Prices Predicted

Condition of wheat crop and storage wheat is such that lower world wheat prices are promised, and lower bread costs should ensue in the fall.

If it were not for the Russian situation, general wheat prices, which are under last year's figures, would be down still more. Russia was the great wheat power of the world for export, and forecasts always hinged on her crop.

But the Soviet experiment causes the Russian peasant to grow what he wants for himself only, because all surplus is taken by the government for general use. There will be a tremendous wheat shortage in Europe, caused by the Russian default in growing, and Canada is the only country that will ship in great volume to Europe, local grain brokers say.

"It will take years for Russia to get to the point where she can supply wheat as of old, and that won't be possible until she alters her present system," said a grain exporter. "If Russia wants to communicate wheat in her own country, that may be her business, but as Russia needs outside money and cannot get it until she produces a world commodity, she will have to alter her system, and pay the Russian farmer in money for his surplus wheat which she can then export and obtain credits in the world markets. But, until she does, Hon. T. A. Cregar, President of United Grain Growers, Ltd., is quite right in saying that European conditions indicate a favorable outlook for the marketing of Canada's grain crop for the next three or four years."

Heavy European demand for wheat, barley and other grains would naturally stiffen prices were it not for the fact that so much wheat has been grown, and the "tough 5" grade at \$1.04 per bushel, is 30 cents a bushel lower than this time last year. The amount of No. 1 Northern in storage at Fort William is practically nil, caused by the heavy rains in last crop period. Brokers say they can't buy 10,000 bushels of it, and it would take a month to get 30,000 bushels together.

There are seven grades of straight wheat, and seven grades of the "tough" kind, which have greater moisture content. Lower grades of wheat, sold at still lower prices than last year, will be used for export, and for domestic flour. There is one western Canada wheat selling to West India flour trade at 94 cents per bushel, but the "tough 5" in the absence of any of the first straight grades which are not tough, is what will be mostly consigned to Europe, and the 3, 4 and 5 straight grades will be mostly used for flour in this country, with Nos. 1 and 2 almost nil in supply.

Outlook for grain prices on the market is also lower, not this being on weather conditions. Rust in the crop or other adverse factors would either hold present figures up or might better them. On the whole lower prices are looked for.

Useful Part Of Equipment

Clock Should Be Included In Furnishings Of Kitchen

A kitchen without a clock is worse than an automobile without a self starter. Every day, and often every hour, valuable seconds or minutes are wasted to ascertain the time.

Most people prefer a wall clock, but others have two alarm clocks in the home and see to it that one is placed in the kitchen. The latter is very useful to the woman who forgets she has something baking in the oven for when she leaves the kitchen, she can set the alarm for twenty, thirty or forty minutes later, and be recalled in time to save the baking.

Have some kind of clock in the kitchen, and see to it that it is kept in repair by one who understands clocks and appreciates the value of time.

"Honesty is the best policy." "I know it is the best policy as used so little." — Karikertian, Oslo.

W. N. U. 1744

COMES WEST

Charles Henry Worby, who has been appointed Superintendent of the Sleeping, Dining, and Parlor Car Department, of the Canadian National Railways, for the Western Region. He has been with the National system since July, 1913, when he joined the department at Winnipeg, where he spent many years of service. Previous to his appointment as superintendent at Montreal, in 1923, he held successively the positions of store clerk, inspector, agent, district commissary agent, acting assistant superintendent and assistant superintendent.

Wheat Pool Pays Interest

The Alberta Wheat Pool has decided to pay interest to its members at the rate of six per cent. on the commercial reserve fund which has been accumulated as a result of its operations during the last three years. The fund now amounts to approximately one million dollars, and cheques for \$60,000 interest will be mailed to the farmer members.

A Modish New Frock

Of girlish simplicity is the attractive frock shown here. The two-piece skirt is shirred to the bodice having a round neck and gathers at the front of each shoulder. View "B" has short kimono sleeves, and view "A" has long sleeves shirred to the short ones and gathered at the lower edge into wristbands. A chic bow is placed at the left shoulder and a wide girle is crusted into a buckle at the front. No. 1583 is for misses and small women, and is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 2 1/2 yards 39-inch material, or 2 3/4 yards 64-inch; 1/2 yard less 39-inch material is required for dress with short sleeves. Price 25 cents the pattern. Home sewing brings nice clothes within the reach of all, and to follow the mode is delightful when it can be done so easily and economically by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make without difficulty an attractive dress. Price of the book 10 cents the copy.

STUDY PLANT DISEASE

Much Information Can Be Collected By Growers And Sent To Botanists

Plant pathologists and botanists in general throughout Canada wish to collect as much information as possible regarding the occurrence of plant diseases. All who are interested in plant life can assist greatly in collecting such information if they would send specimens of apparent plant diseases to the proper authorities. The collector should always take careful notes respecting the amount of damage done, the extent of its development and other observations concerning the disease in question. Many times new diseases are brought to the attention of plant pathologists when specimens were received from farmers and others. In this way a disease which might have been overlooked for several years is immediately placed under observation of competent men and suitable investigations may be commenced. In western Canada the most important diseases are those of the cereal crops, such as the rusts, smuts, rots and minor diseases. To make a complete survey of these diseases each season, as well as to watch for the possible appearance of new ones, demands the attention of several plant pathologists.

Much help can be obtained if everyone who is interested in our cereal crops would report the various diseases which appear in their district. To make the survey complete, diseases of other crops, as well as ornamental plants, should be reported. There are many abnormalities which appear during the early stages in the plant's life, and all interesting specimens should be collected for future study. As the plant develops, leaf and stem spots become common and, finally rust pustules may appear. The spots which appear early in the season are often confused with true rust pustules, causing sometimes a mistaken report of the early appearance of rust. As the head develops, smuts, ergots and head blights may appear; these are usually very conspicuous and consequently should be fully reported. Specimens and communications respecting plant diseases may be addressed to any of the experimental farms or to the Dominion Laboratory of Plant Pathology, University of Saskatchewan, Saskatoon.

Why An Hour Has Sixty Minutes

Division Of Time Handled Down From Remote Era

Why is an hour divided into sixty minutes, a minute into sixty seconds? Would not a division of the hour into ten, or fifty, or a hundred minutes have been more natural? We have sixty divisions on the dials of our watches simply because the Greek astronomer Hipparchus, who lived in the second century before Christ, accepted the Babylonian system of reckoning time, that system being sexagesimal. The Babylonians knew the decimal system, but for practical purposes they counted by sixties. From Hipparchus that system found its way into the works of Ptolemy, about the year 150 in the Christian era. Thence it was carried down the stream of civilization, finding its last resting-place on the dials of our clocks and watches. Miss Muller in "Chips From a German Workbench."

Incubators were first used in Europe in A.D. 1777, but the Chinese and Egyptians practiced artificial incubation over 2,000 years ago.

LUXURIOUS APARTMENTS

A view of the cabin sleeping room of the new 20,000 ton Canadian Pacific liner "Duchess of Bedford."

The Manufacture Of Ice Cream

Now Becoming A Very Important Adjunct Of The Dairy Business

A better knowledge of the food value of ice cream has given this dessert a place in the regular diet of many people. With the growth of the ice cream business there has been a steady improvement in the quality, demanding improved machinery and a better knowledge in the operation of the ice cream plants.

The making of ice cream is recognized as an important adjunct of the dairy industry, and as such, the Dairy and Cold Storage Commissioner has had prepared a bulletin on its manufacture. Mr. A. H. White, the author, has reviewed the opinions and practices of many of the leading makers and has incorporated these as a safe guide for the makers of the ice cream. Ice cream of the present day is something more than frozen sweetened cream. In addition to the fats and solids of milk, ice cream contains gelatin, and such stabilizers and fillers as vegetable gums, starch and egg yolk powder, and other wholesome products that have been found to improve the quality and palatability of ice cream. Various flavoring materials, are used and nuts and fruits are common ingredients.

This bulletin, No. 102, of the Department of Agriculture, at Ottawa, from the Government press, is distributed by the Publications Branch of the Department.

Cars For Canadian Wheat

Railways Will Place All Available Cars At Points Where Required

Railway cars for the movement of this year's Canadian wheat crop are already being assembled in Western Canada, and ten per cent. more cars are to be used at strategic points throughout Alberta than last year.

Notwithstanding the effect of the Canadian Wheat Pools in equalizing delivery of grain throughout the year, there still remains a vast amount to be moved each season immediately following harvest. The railways anticipate this rush by placing all available cars at points where they will be required before the actual movement begins.

Based on the present outlook the transportation companies are preparing to handle 380,000,000 bushels of export wheat alone, besides the domestic movement.

Kansas Farmers Tour Canada

Will Visit Western Provinces To Study Farming Conditions

A special train load of farmers from the State of Kansas will tour British Columbia, Alberta, Saskatchewan and Manitoba in August. In addition to viewing the mountain scenery of the coast provinces they will look into the agricultural possibilities of Western Canada, where many former residents of Kansas and other grain states are now farming. Cheap lands and the favorable marketing conditions established in Canada are the attractions which have brought most of them northward.

The "Husband's Plane"

The "husband's plane" is the title given to a new air service between Crofton, England, and Le Touquet, France, introduced by Imperial Airways recently. The machine leaves London at 4.30 p.m. and enables business men to join their families at Le Touquet before dinner. The return flight begins at 8.30 a.m. All the passengers on the first flight were men.

Lieut. Desmond Burke, the Canadian sharpshooter, and former king's prize winner, who was second this year in the match for this coveted honor.

Annual Hay Crops

In Saskatchewan

Different Varieties Of Oats Are Tested For Hay

A variety of barley called Feder is proving an excellent crop for hay in the Province of Saskatchewan. It is sweet and the straw remains green until the grain is nearly ripe, making it a very palatable forage. Of the different varieties of oats tested for hay at the Northern Experimental Station, Banner gave the best returns, although Victory, Gerlach, and Gold Rain also did well. The crop gave three cuttings. In his report of the Station for 1927, published by the Department of Agriculture, at Ottawa, the superintendent gives the yields of different varieties cut at different stages. The yields were highest when the grain was turning, when Banner gave the highest yield of 6 tons, 832 pounds of air-dried weight. Victory was second with 5 tons, 1,972 pounds; Gerlach, third, with 5 tons, 1,184 pounds; and Gold Rain, next with 5 tons, 857 pounds. Alaska gave the lowest yield of 3 tons, 704 pounds, while Feder barley, which is credited with giving the best quality of feed, gave 3 tons, 1,145 pounds of hay to the acre.

Work Of Illustration Stations

Not Experimental, But Just Ordinary Farms

There are 195 illustration stations in Canada. A separate division of the Experimental Farms Branch of the Dominion Department of Agriculture has charge of direction of the work of these stations. The illustration stations are not experimental farms, but just ordinary farms, chosen in districts where example will do good, preferably located on a highway. The owners of the farms chosen continue to operate, but they do so under supervision. Each station becomes a centre for the growth and distribution of high-grade seed of new and improved varieties of pure bred livestock, and serves as a medium for conveying to the farmers in the vicinity, in a practical way, the results of the experimental and research work carried on at the experimental farms.

What's In A Name

Fairview is the new name of a thriving Peace River District. For many years it has been known to Waterhole, an attractive title to ranchers and stock men, but lacking somewhat in its aesthetic suggestion. The offence to modern sensitiveness has been overcome by the new and appropriate name of Fairview.

Willington Mountain

Willington Mountain with a height of 11,044 feet and situated in latitude 51 degrees, 45 minutes and longitude 116 degrees, 15 minutes on the Clearwater River, Alberta, is named after Viscount Willington, the present Governor General of Canada.

Wise men change their minds occasionally, but fools have none to change.

Some men hatch up excuses to call on their neighbors just about dinner time.

"With my hair cut short I don't look like an old man!" — Dena Humor, Madrid.

For the purpose of laying out a prize list for the World's Grain Exhibition and Conference, to be held in Regina, in 1932, a tentative classification has been prepared by a special committee nominated by Hon. W. R. Motherwell, Dominion Minister of Agriculture.

This committee was appointed as a result of the conference held two months ago between members of the World's Grain Exhibition Committee and the federal department of agriculture, where co-operation of this department was promised to the proposed exhibition.

Following its appointment this committee, composed of J. A. Mooney, Regina; L. H. Newman, Carlisle; Dr. M. J. Sweet, and G. H. Clark, all of Ottawa, has drafted a classification which is tentative in character and intended only as a basis for the consideration of the prize list which should be submitted to those interested in this exhibition.

Exclusive of special classes, the tentative list makes provision for \$202,500 in prizes.

The tentative list proposes six classes of wheat with \$100,000 in prizes; two classes of oats with \$90,000 prizes; five classes of barley with \$15,000 prizes; three classes of field peas with \$3,000 prizes; two classes of field beans, with \$3,000 prizes; two classes of soy beans, \$1,000; one class of rye, \$5,000; one class of flax, \$2,000; three classes of buckwheat, \$3,000; four classes of corn, \$30,000; one class of vetch, \$2,000; two classes of millet, \$2,000; one class of alfalfa, \$2,000; one class of red clover, \$1,000; one class of alfalfa, \$1,000; one class each in sweet clover, timothy, bromegrass, mangels and turnips, \$500 each.

In the wheat classes the varieties proposed are hard red spring, white spring, hard red winter, soft red winter, white winter and durum. A special class is proposed for the best baking and milling varieties. In the oats class, the varieties suggested are medium or late oats and early oats. In the barley class, the proposed sections are: six rowed, hulled, kernels medium to small, kernel long; two rowed, hulled, Chevalier type and Duckbill or Thorpe type; hull-less as well as a special section for the best milling variety.

The feed class proposed with large white or yellow and small white or yellow varieties. The buckwheat class is proposed for black, silver hulled and rough or rue. In the corn section, the varieties proposed are white dent, any other colored dent variety, white flint and any other colored flint variety. The millets class include common and foxtail.

An All-Canadian Motor Route

Motorists to the Rocky Mountains National Park, Alberta, may now enjoy an all-Canadian tour that will take them through 600 miles of mountain scenery, at no time during the journey taking them out of sight of the snow peaks. This route is from Banff, Alberta, over the Banff-Windermere Highway to Flixton, British Columbia, and then down the Columbia Valley, returning east over the Crownsnest, Pass route.

No Next Time

John, aged four, taken by his father to the dentist, was very good and brave the first time, but the second time very frightened, and the dentist could do next to nothing. On his father telling him to apologize and say he'd be a good boy next time, John said, "I'll be a good boy next time, but I'm not coming again."

The largest group of optimists in the world are the 8,000 Jews the census bureau of Great Britain says live in Scotland!

Canada has the most extensive sea fisheries in the world.

"With my hair cut short I don't look like an old man!" — Dena Humor, Madrid.

On Kitchener's Favourite Charger

"KIDNAPPED" aboard the old Royal when the ship was commandeered by His Majesty's forces as a horse transport, during the Boer War, a boy of ten spent two glorious years on the high seas. The boy is now Frank Daly, District Passenger Agent of the Canadian Pacific Railway at Vancouver, B.C., and his adventure was recalled by old photographs recently unearthed in England. Memories of Kitchener and of the Boer War are recalled by the discovery of the photographs. The snap-shot on the center shows Mr. Daly at the age of ten years on the back of Kitchener's favourite charger. This was taken on board the S.S. "Mount Royal" of the Elder Dempster Line at Cape Town, South Africa, during the Boer War, when the vessel was

requisitioned by the Government for the transport of horses. The oval on the left shows the boy on the bridge of the ship. Captain James A. Murry, captain of the ship, is seen holding the horse's head. He was later Commodore-Captain of the "Empress of Britain" and other steamships of the Canadian Pacific fleet, after the Elder Dempster Line was taken over by them. He was killed in the great Halifax explosion during the Great War. The Boer War involved exciting adventures for the ten year old boy. He was on board as guest of the captain at the time the war broke out, and the vessel was impressed into Government service as a horse transport. They sailed for Cape Town with a load of horses, expecting to return to Liverpool and the regular run

between the British Isles and Canadian ports, after discharging their cargo. The boat was ordered off elsewhere, however, and not until a year and a half had elapsed did the lad return to his home, by that time a seasoned mariner. On one occasion during the time they were on war service, the men went on strike, and the "Mount Royal" put into Barbados, where the whole crew were placed under arrest, and a black one temporarily substituted. The change was worse than before, however, and the remainder of that voyage to New Orleans was made at a pace of not over six miles per hour. Mr. Daly has been with the Canadian Pacific Railway twenty-two years, over twenty years of which he has spent in Vancouver.

KEEPING ABREAST OF THE TIMES

1.—One of the Canadian Airways Limited monoplanes used in the Toronto-Montreal service. 2.—The new Canadian Pioneer is typified by A. St. Martin, pilot. 3.—At Leaside, Toronto, the pilot accepts for delivery. 4.—The manifest is signed before taking off.

A two day lead over ordinary Express Service between Rimouski and the west is now gained through the use by the Canadian Pacific Railway, of an air mail and Express package service between the Gulf Point and Montreal, Ottawa and Toronto. Parcels taken off incoming ships at Rimouski early Saturday reach Montreal, Ottawa and Toronto by plane the same day and, being carried from the latter point on the Vancouver Express arrive in Winnipeg on Monday morning and Vancouver Wednesday evening.

At present the new express service to and from the ships will be bi-weekly, with provision made for whatever domestic traffic offers. Air transportation must be seriously taken into account if one would keep abreast of the times, according to T. E. McDonnell, vice-president and general manager of the Canadian Pacific Express Company who sees great air service development in the interests, and to the great advantage of both the business and financial men of the Dominion.

Here and There

(58) Completing her 28,000-mile cruise around the world in the course of which she visited 18 countries and 27 ports, Canadian Pacific flagship Empress of Australia docked at New York April 12, from which port she sailed December 2 last. She was carrying 320 passengers, including prominent society and banking leaders of Montreal, Toronto and other Canadian and United States cities.

Winnipeg.—Over a thousand new homesteads have been filed in the four western provinces during the month of January and February this year, being 1,088 as compared with 627 for the same two months' period of last year. By provinces, Manitoba reports 74 homesteads, Saskatchewan 430 as against 336, Alberta 502 as against 213, and British Columbia 39 against 9.

Raymond.—According to a cable from London, England, discoveries likely to be important for the Canadian beet sugar industry have been made at Oxford. A means has been found to dry the sugar beet and thus allow the manufacture of sugar to be continued throughout the year, and it is even believed that a method of treating the resulting effluent in such a way as to free it from poison has also come to light. The discoveries are a result of four years' research work.

Vancouver.—I am satisfied with the progress of Canadian products in the Chinese trade field and prospects for the increase of trade are extremely good," Col. Moore Cochrane, Canadian Government Trade Commissioner to China, said here on his arrival from the Orient. "Canadian products of all kinds and especially those from British Columbia are being very well received in China now. There is no real boycott against Canadian goods; the Chinese merchant knows his prices and knows where to place his orders."

Announcement has been made from Canadian Pacific Railway headquarters that a "Remembrance Tour" is being organized for the coming summer. Ex-soldiers, their relations and friends to visit the scenes of battles in France and Flanders during the Great War. The tour will leave Montreal July 12 next, on board Canadian Pacific liner "Duchess of Bedford", one of the new cabin class steamships which will be placed by the company on the St. Lawrence route this year.

A nineteen-year-old youth, Arthur Cleland Lloyd, of Vancouver, was the winner of the \$1,000 prize for orchestral suite composed for the Musical Festival to be held at Quebec May 24-28. Three other prizes were awarded and a further \$1,000 for a cantata will be given later. The prizes, which totalled \$5,300, were the gift of W. W. Murray, chairman and president of the Canadian Pacific Railway. The contest was open to all the world and compositions were received from Great Britain, France, Hungary, Denmark and the United States as well as Canada.

Ottawa may conceivably be selected for a future meeting of the Council of the League of Nations and Rt. Hon. W. L. Mackenzie King, Prime Minister of Canada, should attend the next assembly of the League in appreciation of the honor paid Canada by her election to the council of the 14 leading powers of the League of Nations, was the statement of Sir Herbert Ames, for seven years financial director of the Secretariat of the League, when interviewed on the Windsor street C. P. R. station here recently.

Here and There

(58) With concrete now up as far as the first bedroom windows and steel up to the fourth, the Royal York C. P. R. tourist hotel in Toronto is well up to schedule and is expected to be completed in time for the opening next May, notwithstanding the short strike of the steel and building trades.

W. M. Van Valkenburg, president of the Regina Board of Trade, says that his city and province are out to capture industries. That is one reason for his visit to Montreal and the Eastern States. He figures that the mineral resources of the province should provide the basis of a number of industries, as 42 per cent of the provincial area lies within the pre-Cambrian shield.

Inauguration of the new New York-Yarmouth, Nova Scotia, passenger ship service recently represented the first entrance of a vessel from New York into Yarmouth harbor for the past 20 years. This was the S.S. Evangeline of the Eastern Steamship Line, carrying 150 passengers. She is of 5,000 tons and her sailings connects with the Dominion Atlantic Railway and so enables tourists to reach Nova Scotia sea and holiday resorts.

This summer will witness a great deal of activity on the part of the grain companies as well as the Wheat Pool in the construction of elevators at country points in Alberta to take care of the larger harvest which are expected. Another company which has just announced its intention to enter on a construction program is the Gillespie Grain Company. According to John Gillespie, president, the firm plans to erect six new elevators at once, with a capacity of 40,000 bushels.

A SCHOOLBOY'S ESSAY

"The Gote—a gote is about as big as a sheep if the sheep is big enough. A female gote is called a buttress, and a little gote is called a goatee. Gotes are very useful for eating up things. A gote will eat up more things than any animal which isn't a gote. My father once owned a gote. Everything he says is so, even if it isn't so. That is all I know about gotes."

The New Frost & Wood No. 5 Light Draft Binder and a Few of its features:

1. One-piece angle steel platform frame.
2. Ball thrust bearings in each end of drive wheel axle.
3. Detachable sleeve in drive wheel.
4. Large drive wheel with extra broad tread.
5. Elevators supported direct from metal seat pipe.
6. Diagonal brace in lower elevator.
7. Full floating upper elevator.
8. Grease cups on drive wheel, grain wheel, fortruck wheels, packer arms and pitman crank bearing.
9. Unbreakable steel short pole for forecarriage
10. Easily operated chain driven reel.
11. All shifting levers handy to operate.

WHAT ABOUT A NEW CULTIVATOR?
to do your weed cleaning on your summerfallow. This can be had in Tractor and Horse sizes.

I have on hand the British American Oils and greases, and North Star Oils and Greases, and can give you any grade you want for Tractor or Car.

THE EASY VACUUM WASHING WASHER
Come in and see the New Vacuum Washing Washer which is made in three or four different models and styles, both Electric and Gas Engine.

Come and get one of these machines and try it for a week free.

CAR OF BINDER TWINE COMING
I am getting in a car of Binder Twine and would like to get your order for same.

The Baldwin Combine is here and I will gladly show you this machine.

MACHINERY DISPLAY AT IRMA FAIR
Do not forget to look at the machinery display which I will have at the Irma Fair, August 14 and 15th. This will be a good place to tell which machine is the Best.

Here and There

(108)

Lumber companies report the greatest volume of business in Alberta since the boom year of 1912. One hundred million feet of lumber is being cut in Alberta this year but the bulk of the supplies come from British Columbia mills.

A press report from Telfordville states that the farmers are well pleased with the allocation of stations on the twenty mile extension to the Hoadley subdivision of the Canadian Pacific Railway. A large number of settlers are going into the territory which will be served by this extension and the old timers in the district are now clearing and breaking as much land as possible.

Kyohai Kato, who represents a Tokio concern, and who has just concluded a business visit to Canada, stated that he had bought 8,000,000 bushels of wheat in Canada, or about half of Japan's total importations. He explained that Japan got more for its rice than Canadian wheat cost in their market, hence the present purchase. He said, too, that Japanese were eating more wheat foods and adapting themselves to the stronger diet.

"The Maritime Provinces in particular, and Canada in general, need more commercial advertising," was the opinion expressed by Hon. J. B. M. Baxter, Prime Minister of New Brunswick, when interviewed on arrival on board the "Empress of Scotland" after a month's visit to Europe. British settlers in the Maritimes have been quite satisfactory as regards type and quality, he said, and he hoped that we will be able to obtain great many more spread over a period of years.

Part of a litter of eight red foxes, which, together with the vixen, were captured in the Arcola district recently, have been brought to Moose Jaw by Mr. W. White, who has established a fox farm east of this city. It is many years since red fox have lived in large numbers in their natural state in the southern part of this province, where these were captured. Mr. White intends to start raising patch foxes, a cross between red and silver or black fox, as a commercial enterprise.

Wool growing in Western Canada is increasing rapidly, according to W. W. Thomson, manager of the western branch of the Canadian Co-operative Wool Growers Limited. Up to June 30th, he pointed out, four carloads of wool had left Regina for Weston, Ontario, for grading by Government authorities as compared with one for the similar half year of 1927. This year's shipments represent 108,000 lbs. from 300 flocks in the provinces.

The mystic number "13" holds no terrors to the Royal Order of Masters, an organization within the Ismailia Temple Shrine of Buffalo, who sailed on Friday the thirteenth of July, with thirteen members in their party, for Montreal for Liverpool. The society meets on the thirteenth of each month at 5.15 in the afternoon, and is divided into courts of 13 members each. The party of thirteen sailed on the crack new Canadian Pacific liner "Duchess of Bedford" in a group of shriners visiting the old world.

There is considerable tree planting activity along the Medicine Hat division of the Canadian Pacific Railway. At Shadokan alone twenty-five bundles of small trees were received the other day from the Forestry Branch at Indian Head, Saskatchewan, and all are now planted. Many other villages are competing actively.

Equaling the speed across the Atlantic ocean made by passenger liners of medium size, the five 10,000 ton vessels of the "Beaver" class have been achieving records in oceanic freight transportation for the Canadian Pacific Steamships. The speedy quintette of freighters joined the company's fleet this year and have been running on as frequent and rapid a service between Canada and Europe as many passenger boats.

Chicago. — "Smiling Billy Hogan," veteran C.P.R. conductor, took "The Mountaineer," Canadian Pacific flyer from Chicago to Vancouver out in its initial run of the season this year. The train is one of the "Big Five" C.P.R. trains de Lux operating from Chicago and the east of Canada across the continent during the summer. Conductor Hogan joined the "Soor" line in 1888 as stoker on the old Wisconsin Railway, and is to-day one of the veterans of the company.

Montreal. — A new era in Canadian trans-Atlantic passenger history, has been inaugurated in Montreal, where the five new liner "Duchess of Bedford" docked recently. The new 20,000 ton vessel, the largest to ascend the St. Lawrence to Montreal, is the first of four cabin class sister ships of the new "Duchess" type, which will supplement the Canadian Pacific's trans-Atlantic and winter cruise services. Speakers at the banquet held on board on arrival in Montreal after her maiden voyage eulogized the occasion as an event of national significance.

The Feast of St. John the Baptist, greatest of French Canadian religious spectacles, will be celebrated throughout the province of Quebec shortly. The Montreal baseball stadium, which will accommodate 25,000 persons, will be crowded by spectators of a French Canadian origin, to be followed by a spectacular fireworks display. On the Sunday afternoon, thirty floats, depicting French Canadian scenes, many bands, and over 10,000 singers and minstrels, will come together in a procession several miles long through the streets of Montreal.

VIKING

The garden party held at the Harris farm, ten miles south of town last Wednesday afternoon, was fairly well attended in spite of the cold weather that prevailed. A very good program was given which was greatly enjoyed. Mr. Claypool, one of the directors of the cattle pool, gave an interesting address on the workings of the pool and answered a number of questions that came up. Other numbers that were enjoyed were vocal solos by Mrs. Damar Anderson, Miss Stony, recitations by Miss Mattie Dale and Helen Burgess, and violin solos by Mrs. T. A. Cox. Miss Hilda Canavan played the piano accompaniments. A sale of home-made articles and home cooking, and a fish pond was a feature. Lunch was served at a booth on the grounds, after which all departed feeling that the affair had been well worth while.

Mr. Andrews and Mr. Lucas who were advertised to be present, did not appear.

Mrs. Jas. Finnimore entertained the ladies of Rutherglen district and friends at afternoon tea on Wednesday of last week in honor of Mrs. Art Day who is shortly leaving to make her home in California. Mrs. Hans Hanson on behalf of the ladies presented Mrs. Day with a basketful of gifts as a token of their high esteem. Mrs. Hanson voiced the regrets of the ladies at losing Mrs. Day and family from the district, but stated that a warm welcome would always be extended should they at any time decide to return from California. Mrs. Day replied very suitably saying she would remember the happy times spent in Rutherglen district and thanked the ladies for their kindness.

The council of the Village of Viking held their regular meeting last Monday evening when all members were present.

The minutes of the previous meeting were read and approved. It was decided to hold a court of appeals against assessment on Monday, August 13th, at 8 p.m.

A motion was passed empowering the mayor and secretary to borrow the sum of \$1,500.00 for the purpose of current expenses and paying for improvements.

A few bills and accounts were read and passed.

It was moved and passed that two more cement crossings be constructed on Main street, one from Collier Bros. garage to Hilliker Bros. store, and one from the telephone office to Kelly's Hardware.

Read and ordered placed on file for future reference, after which the council adjourned.

Mr. and Mrs. H. B. Collier and daughter Miss Phyllis returned on Sunday from a trip to Banff and Golden, B.C. Herb says there are more thrills on what is known as the Triangle Tour through the mountains than on any other tour in Canada, and it's not a long way from Viking either.

Mr. and Mrs. E. H. Kirsch and children Teddy, Frances, Loretta, Jean and Margaret arrived by motor from Auburn, Washington, last week and are visiting friends and relatives in this community. The Kirsch family formerly resided three miles west of town and left here for Washington about eight years ago.

Mr. and Mrs. J. J. Skaltzky motored to Tofield last Friday where they caught the Confederation train to Edmonton and visited in the city during the day, returning home in the evening. While there Mr. Skaltzky had the pleasure of meeting the Hon. Mr. Forke, and had a talk with him.

The gun club held a practice shoot last Tuesday evening and we hear there were some records broken.

Val Marker who has been in the hospital for the past week suffering from an infected arm, is doing nicely and hopes to be out this week.

W. J. McDonough, representative of the Western Catholic, a newspaper published in Edmonton, was a visitor in town this week.

Mrs. N. C. Graham and Mrs. J. L. Dadds were in Wainwright Tuesday as Judges of the ladies work at the Wainwright fair.

Mrs. J. L. Horton and son Ormond motored up from Wainwright on Saturday and have been visiting with relatives and friends for a few days.

The new residence being erected on the E. W. Cottrell farm is nearing completion and when completed will be one of the best in the Morinville district.

Mr. and Mrs. Fred Hanson entertained a party of young people last Sunday afternoon. One of the pleasing events was the reading of the tea cups by Mrs. Featherstone.

Mr. and Mrs. Sam Gilroy and family motored up from Ord, Nebraska and are visiting at the home of Mrs. Mary Powell. They found the roads in pretty fair shape and are agreeably surprised at the wonderful fields of grain in Alberta.

Steve Swift returned home from Edmonton on Tuesday where he had been receiving medical attention.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

PAINTED FIRES

—BY—
NELLIE L. MCCLUNG

CHAPTER XXIX.—Continued.

The heavy rain had washed the roots of the old dead grass into the ground, leaving the bold young shoots showing, and the air had such a balmy mildness that Helmi was content just to sit and breathe it, and watch the clouds, clear and white, like lamb's wool, sailing overhead in the limitless blue.

She wanted to sing a song of the passing winter, with all its strength of frost and weight of snow, its frozen rivers and leafless trees, for every budding tree and springing flower and carolling bird was singing it, too. She remembered a song Mrs. St. John used to sing, which she said was an old-fashioned tune, but she sang it to please the doctor, who liked the old songs best.

"Blue bird, true bird, bird with the golden wing,
Do you bring me a letter or do you bring me a ring?"

Helmi brought out a chair, and sitting on it, nursing her knees, she sang in perfect happiness. She had four dollars in her pocket; a sick baby in the isolation hospital; a dog with three pups to whom she had promised food and shelter; a husband who apparently had deserted her; not a relative nearer than Finland; but she sang a song of hope, and love, and spring, looking into the blue sky above her, for in her heart there was the peace which passeth all understanding!

Mrs. McMann, on her way to the store, saw Helmi sitting at the end of the house and heard her singing, and forthwith forgot that she had left an oven full of pies.

"Helmi," she called, as she came

It May Be Urgent

When your Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you can use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains or other suffering. Never without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

Fletcher's CASTORIA

W. N. U. 1744

Learn to shut the door at night and open it in the morning, and when Lili is better I will come back. You will like my Lili, Mrs. McMann; she can smile now and play with her hands."

Mrs. McMann sighed. "I am always sorry when I see a girl baby—life is so hard for our women!" Helmi got another letter at the post-office, a letter from Arthur Barker enclosing another fifteen dollar cheque. He was over in France now, on active service, and the letter was written as he sat waiting for the signal to go over the top in an attempt to capture a German position.

Helmi had to have someone to write to. Helmi, someone who cared, and I want you to do something for me. It worries me to think of my house and garden lying idle there and going to ruin. I wonder if you would go there to live. The garden has raspberries and currants and strawberry plants too, and there are provisions in the house for a year. If you go there I want you to take Cleo, too, and give her a home. She is wonderful dog. I cannot tell you what she has been to me. And my horse, Sailor, that I left with the Ransons would be handy for you to drive to town. I would feel better if I knew you were there, dear Helmi, and I hope you will go. It does not seem reasonable to believe that I shall ever come back, but if I do, the place will be in better shape for your having occupied it. So you will be doing me a good turn. Write soon and often, Helmi, please."

At the bottom of the letter there was a postscript. "You will never need to be bothered with these meddling nosy prying people hunting for coal, for I bought all the mineral rights; so if the bank of the creek is solid coal, and I rather think it is, they can never come in without your consent. If you want to plant the garden this spring you will find the seeds in the post-house." All labelled. Maybe I had the wrong about on life. Helmi, wanting to build a wall around myself. I've had time to think it over, and I can see it was a mistake. One cannot live that way. Now I want you to do what you like with everything that is there. I have made my will and left it to you. My lawyer here will arrange matters fully if anything happens. I enclose his address. Now we are going—A. W."

Helmi was in her own little house when she read the letter, Cleo whimpering at her feet as if she knew her master had written it. "He is well, Cleo, and he wants you and me to live together, and so we will. We had decided that already, and now I see God has sent me a home as well as a dog to keep me company. I do not know how we will make a living there, eight miles from any settlement, but we should worry over a little thing like that. God will provide for us some way, Cleo."

(To Be Continued.)

Reliable Weather Sign

Red Sky In Morning Sues Indication Of A Storm

An old English rhyme says "Red at night is the shepherd's delight. Red in the morning is the shepherd's warning."

The idea it expresses is known in nearly every country in the world. Even the ancient Egyptians and Greeks had sayings similar to the above. Furthermore, it is scientifically true. Red skies are really weather forecasts. If the atmosphere is clear in the evening or morning sun's light is red because the blue, of which the ordinary white light of the sun is made up has been absorbed by the great length of atmosphere through which the slanting rays of the sun have to pass. In the evening the light of the sunset illumines the clouds on the eastern side of the sky. This shows that the clouds have gone by and are taking the rain with them. Thus we get red at night, indicating fine weather. In the morning, the rising sun being in the east, the light illumines the western horizon and its clouds, which are on their way to us. We need not be shepherds to know that if the sky is red and lowering in the morning we are in for a good "soaker" before lunch-time comes.

A Slight Omission

A farmer was accused of having slandered his neighbor. "Did you call him a rogue and a liar?" asked the judge.

"Yes, I did!"

"And did you call him a thief?"

"No, I forgot that!"

Among the strange specimens discovered in Brazil are flat fish with a poison spike in their tails, and vultures which make noises like barking dogs.

In Georgia every unmarried man or woman of 30 has to pay a tax of six dollars yearly.

WRIGLEY'S NEW HANDY PACK P.M. CHEWING SWEET

A treat in the Peppermint-flavored sugar-coated jacket and another in the Peppermint-flavored gum inside—utmost value in long-lasting delight

Voices Have Individuality

No Two Have Same Tone, Sky Blind People

In the blind, the faculty of hearing is usually intensified and one thus handicapped in speaking of voices says: "Many are similar, to be sure, but I have never encountered absolute doubles, and in general voices are as sharply differentiated as faces—in fact, often far more. The only difficulty I have experienced, strangely enough, is caused by one person having several voices. All of us have; we change tone and quality more or less unconsciously according to our mood and condition. But in some cases the change is disarmingly marked. One woman, for example, has as many as five voices, each quite distinct. The physical condition is also revealed by the voice in a striking degree, both as to change and normal characteristics. Put people, for example, have a voice quality which is all but invariably detectable. Character, too, is easily read. In fact it seems that character is revealed in the voice even more fully and accurately than in the face, no doubt because the feeling, failing to recognize this, makes less of an attempt to mask the voice."

Parliamentary Courtesy

Language In The Free State Parliament Is Sometimes Lurid

The new Flannan Bill, tactics of baiting the Speaker which culminated in the suspension of Mr. de Valera's chief whip, Mr. Aiken, are not likely to increase the prestige of the party. In a letter to the press, Mr. Aiken, in justification of his attack on the Chair, insists that only an assembly poisoned by English influences could object to have its Speaker described as "a damned hypocrite," "a party hack," and "a mean skunk." Unfortunately for himself and his colleagues the country is still so enslaved to an alien tradition that it regards as vulgar abuse expressions that, in the Gaelic state of Mr. Aiken's vision would apparently be the flower of parliamentary courtesy.—Dublin Correspondence, The New Statesman.

The Thoughtful Sportsman

Grouse season had started, and in the little Highland hotel lounge some sportsmen were smoking.

"Yes," said one suddenly, "everything I shoot I send to the hospital."

"How thoughtful and kind of you," broke in another.

"Yesterday," he continued, "I shot the gamekeeper."

BABY GIRL HAD DIARRHŒA WHEN CUTTING TEETH

Mrs. A. J. Murray, Gull Lake, Sask., writes:—"Last summer, my baby girl was cutting teeth and became very weak with the effects of diarrhea. I didn't know just what to do for her as she couldn't retain anything. At last one of my neighbors said to me, 'Haven't you any

why, I wouldn't be without it where there are children."

"My husband went to town and got a bottle, and the very first dose helped her wonderfully, and in three days she was well over the diarrhea and was running around as well as ever."

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

JUMPING TOOTHACHE

You have been fortunate indeed if you have never experienced that worst of dental pains—the "jumping toothache."

But perhaps you have listened sympathetically to your little chap as he tried to tell you between sobs how something just seemed to be jumping up and down inside the tooth that pained more and more intensely as he lay with his cheek against the pillow.

Almost instinctively, perhaps, you have him sit up, and he found happy, that it did not hurt nearly so much as when he was lying down.

Now, you thought perhaps it was because he stopped thinking about it so much when sitting up that made the pain more bearable, but just why it "jumped" you were not so sure.

Well, no doubt you have had a cut finger with an area of inflammation around the wound, and you noticed that the pain was of a throbbing character, that with each pulse beat there was a sharp little stab, so to speak.

Now, the same with the tooth, — with each heart-beat, a new supply of blood is forced into the pulp tissue, which, being inflamed and already engorged with blood, is subjected to an increased and severe pressure (or heat), and a consequent response on the part of the nerves as they are subjected to the normal pressure. (This, we call pain.)

Then with your little chap sitting up, the flow of blood to the head was reduced, resulting in a milder rush of blood into the tooth pulp which caused a decreased pressure, with lessened pain.

SAVE THE CHILDREN

In Summer When Childhood Ailments Are Most Dangerous

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera, infantum and diarrhoea carry off thousands of little ones every summer, in most cases because the mother does not have a medicine at hand to give promptly. Baby's Own Tablets relieve these troubles, or if given occasionally to the well child they will prevent their coming on. The Tablets are guaranteed to be absolutely harmless even to the newborn baby. They are especially useful in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Canadian Wool Prices Pay

Prices Being Paid Are Considerably Higher Than Last Year

Wool prices in Western Canada this season are running from 24 to 28 cents a pound, compared with 17 to 20 cents last year. In the range country of Southern Alberta, from 24 to 26 cents is being offered, with 24 to 28 cents in Ontario, and from 21 to 28 cents per pound in Quebec. The first settlements for Ontario early spring and winter shorn wool, which are now being made by the Canadian Co-operative Wool Growers, reflect these higher values, being as much as 40 per cent above the settlement prices of a year ago. A keen demand is reported for medium qualities, in which class the greater part of the Canadian production falls.

Paring a corn is both risky and ineffective. It is much better to use HOLLAND'S Corn Remover and eradicate them entirely.

Plane Suitable For Trans-Ocean Service

German Machine Has Many Features To Support This Belief

The first plane which German experts believe suitable for trans-ocean service has been completed by the Rohrbach Metal Aeroplane Works.

The reason that engineers believe their "flying yacht" is adapted to trans-ocean flights is because it has a cruising radius of two thousand five hundred miles without installing extra fuel tanks, a boat's fuselage which is seaworthy should forced landings on the ocean become necessary, and a carrying capacity for twelve passengers, besides a crew of five and several tons of post and freight.

In addition the designers calculate that three motors will give the plane a speed of one hundred and fifty miles an hour, making a Hamburg-to-New York trip possible in the space of twenty-four hours, including two stops for refuelling. After tests, however, the first trip will be made to Buenos Aires, for it is the intention of Luftansa to open trans-ocean air traffic over the Germany-to-Argentina route first on account of the shorter distance across the open water, and more favorable weather around the Equator.

Minard's Liniment — The Universal remedy.

THE Firestone Gum-Dipping process strengthens the tire to meet the demands of hill climbing, quick stops, sudden turns and high speeds. The Firestone tread is scientifically designed to grip the road in emergencies. You can have this extra safety on YOUR car. Ask your local Firestone Dealer. He will save you money and serve you better.

Always put a Firestone steam-rolled, leak-proof tire in your Firestone tire

Firestone GUM-DIPPED TIRES

Little Helps For This Week

"Fear not, believe only!"—Luke viii, 50.

The childlike faith that asks not sight.

Waits not for wonder or for sign. Believes, because it loves aright.

Shall see things greater, things divine.

Heaven to that gaze shall open wide, And brightest angels to and fro On messages of love shall glide.

"Twixt God and Christ below." —John Keble.

The blessed thing which the Bible calls, is the state of the soul in which the things of God become glorious certainties. It matters not how it comes, whether as to Thomas through sight, or whether through the evidence of the Spirit; and yet the faith of which Christ said, "Blessed are they which have not seen and yet have believed," was a spiritual fact.

—Frederick William Robertson.

Mothers Value This Oil.—Mothers who know how suddenly cruel may seize their children and how necessary prompt action is in applying relief, always keep at hand a supply of Dr. Thomas' Electric Oil, because experience has taught them that this is an excellent preparation for the treatment of this ailment. And they are wise for its various uses render it a valuable medicine.

Goes North For Museum

Dr. R. M. Anderson, of the National Museum, Ottawa, will accompany the 1928 Canadian Arctic expedition on its annual patrol to the posts in the far northern islands. At points of call he will collect zoological material for the Museum, and obtain information on points of interest in these regions.

Minard's Liniment For Blistered Feet.

All previous records were broken by British Columbia's industrial payroll in 1927, when it reached a total of over \$177,000,000.

ECZEMA IN ITCHY PIMPLES

Affected Nearly All of Body, Cuticura Heals.

"Eczema broke out in pimples and affected most all my body. The pimples were not very large but were red and hard. Some of them festered and then scaled off. The pimples were so itchy and burned so much that I used to wake up in the night and scratch them. My clothing aggravated the breaking out very much."

"I began using Cuticura Soap and Ointment and in four weeks I was completely healed, after using two cakes of Cuticura Soap and two boxes of Cuticura Ointment." (Signed) Frederick A. Zink, Robinson's Corner, N. S.

Cuticura Soap and Ointment and Talcum are ideal for daily toilet uses. Sample Book Free by Mail. Address: Canadian Cuticura Sales Corporation, 1501 St. Denis St., Montreal, P. Q. Cuticura Shaving Stick 25c.
